# Project Design Phase-II Technology Stack (Architecture & Stack)

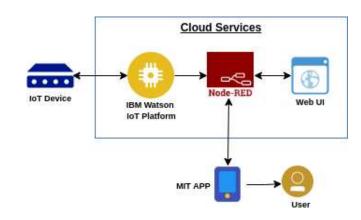

| Date         | 11 November 2022  |  |
|--------------|---|--|
| Team ID      | am ID PNT2022TMID13187  |  |
| Project Name | Project - Smart Farmer-IoT enabled smart farming application. |  |

#### **Technical Architecture:**

The Deliverable shall include the architectural diagram as below and the information as per the table 1 & table 2

#### **Guidelines:**

- 1. Include all the processes (As an application logic / Technology Block)
- 2. Provide infrastructural demarcation (Local / Cloud)
- 3. Indicate external interfaces (third party API's etc.)
- 4. Indicate Data Storage components / services
- 5. Indicate interface to machine learning models (if applicable)

### **Table-1: Components & Technologies:**

| S.No | Component                           | Description   | Technology                  |
|------|-------------------------------------|---|-----------------------------|
| 1.   | User Interface                      | How user interacts with application e.g., Web UI,<br>Mobile App, Chatbot etc. | MIT app                     |
| 2.   | Application Logic-1                 | Logic for a process in the application  | Node red/IBM Watson/MIT app |
| 3.   | Application Logic-2                 | Logic for a process in the application  | Node red/IBM Watson/MIT app |
| 4.   | Application Logic-3                 | Logic for a process in the application  | Node red/IBM Watson/MIT app |
| 5.   | Database                            | Data Type, Configurations etc.  | MySQL, NoSQL, etc.          |
| 6.   | Cloud Database                      | Database Service on Cloud   | IBM cloud.                  |
| 7.   | Temperature sensor                  | Monitors the temperature of the crop  |                             |
| 8.   | Humidity sensor                     | Monitors the humidity   |                             |
| 9.   | Soil moisture sensor (Tensiometers) | Monitors the soil temperature   |                             |
| 10.  | Weather sensor                      | Monitors the weather  |                             |
| 11.  | Solar panel                         |   |                             |
| 12.  | RTC module                          | Date and time configuration   |                             |
| 13.  | Relay                               | To get the soil moisture data   |                             |

## **Table-2: Application Characteristics:**

| S.No | Characteristics          | Description  | Technology |
|------|--------------------------|--|------------|
| 1.   | Open-Source Frameworks   | MIT app, Node-Red  | Software   |
| 2.   | Security Implementations | Drone technology, pesticide monitoring, Mineral identification in soil | Hardware   |
